FROM: *RTG* R. T. Ogg, Remediation Programs, Bldg. 080, X8608

SUBJECT: DEVELOPMENT OF A FIELD SAMPLING PLAN FOR SURFACE WATER AND
SEDIMENTS FOR THE INDUSTRIAL AREA INTO OPERABLE UNIT NO. 12 -
RTO-022-92

The Department of Energy/Rocky Flats Office (DOE/RFO) has requested EG&G Rocky Flats, Inc. (EG&G) to develop a "field sampling plan" (FSP) for surface water and sediment characterization activities for the industrial area, and integrate the FSP into an operable unit (OU). It has been decided to integrate the FSP into OU 12. A meeting has been scheduled for Monday, August 31, 1992, from 10:00-12:00 at the Interlocken lunch room. DOE/RFO and their subcontractor, SMS, will be present at the meeting. I will develop an agenda for Monday's meeting.

DOE/RFO has also stated that ground water monitoring/characterization activities for the industrial area should be integrated into one OU. EG&G can expect a letter from DOE/RFO requesting EG&G to integrate the ground water activities for the industrial area into an OU. The primary focus of Monday's meeting will be to discuss surface water and sediment sampling activities; however, it would be prudent to have a ground water representative present at the meeting.
